# Integration with popular CMS

1C-Bitrix

WebAsyst Shop-Script

**UMI.CMS** 

Magento Magento

Joomla

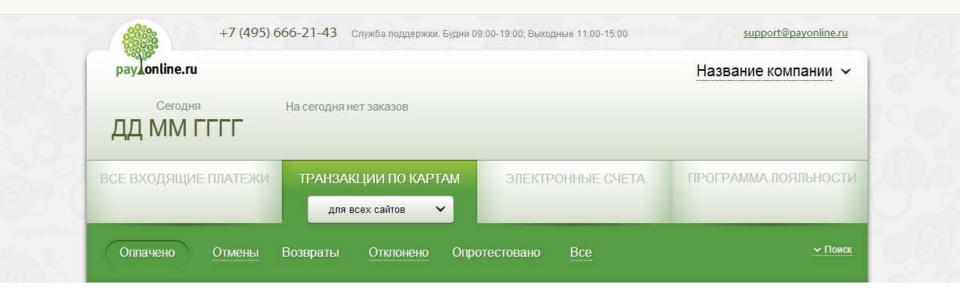

**PHPShop** 

Others...

# Manage your payments with a single click

In your personal merchant Interface you are able to see the details about your transaction activity in real time.

# **Merchant Interface Functionality**

- Ability to generate accounting documents.
- Ability to monitor all transactions online, to confirm and cancel payment transactions, to issue a full or partial refund.
- Downloading detailed annual reports based on the payments made.
- Ability to create an extensive system of access, that helps to set different roles for employees, that also work with the data in Merchant Interface.

# **High level security**

The payment solution Pay-Foreign works on the basis of PayOnline self-developed features using advanced settings of 3D-Secure standard.

# PayOnline technological base allows

To reduce the number of declined transactions by 30%, and level of chargeback to 0,02%.

To set 3-D Secure only for certain countries.

To customize over 140 fraud management filters.

# Advanced payment authorisation settings

"Smart Validation" — checking the card holder by deducting a random amount of money that the client has to confirm.

"PreAuthorization" — ability to reserve money on a cardholder's account.

# **Setting Mobile payment**

If you accept online payments through Pay-Foreign, you can increase the amount of onlinesales through mobile payments by using our Pay-Mobile payment solution.

Pay•Mobile — receive payments directly from mobile applications.

## PayOnline supports its merchants

#### **Helps:**

- To integrate payment solution with mobile application.
